PELLIZZONI

Company

leather design furniture manufacturer

Enrico Pellizzoni brand was created in 1986 from a tradition in leather production that had spanned almost one hundred years. Since the early 1900s, the Pellizzoni family had made of leather their passion, initially entering the footwear sector but immediately repositioning themselves in furnishings. The company is traditionally based in Mariano Comense (Como - Italy) and has been established in its current 4,000 sq. m. complex since 1988, where essential residential and office furnishings are produced: chairs, armchairs, stools, sofas, tables, desks and accessories.

Il marchio Enrico Pellizzoni nasce nel 1986, dopo un'esperienza di lavorazione del cuoio centenaria. Fin dal 1900 infatti la famiglia Pellizzoni ha fatto del cuoio una vera passione; entra inizialmente nel settore calzaturiero orientandosi poi nella produzione di articoli d'arredo. L'azienda storicamente situata in Mariano Comense (Co), dal 1988 si è stabilita nel suo attuale complesso di 4000 mq, dove produce complementi d'arredo per la casa e l'ufficio: sedie, poltrone, sgabelli, divani, tavoli, scrivanie e accessori.

Sustainability

we work for a clean earth

Full grain leather CPF is a material obtained by first quality bovine hides coming from EU member states. The part of leather used is the shoulder. During the tanning-phase, in which only natural substances are used, the pentachlorophenol is absent according to EU Legislation. Tannin extracts are a fundamental ingredient for the slow tanning process and the quality of its result. The finishing of the leather is carried out with pigments and resins made of caseins, having therefore a very low toxic content. During the last phase, in order to prevent the surface from absorbing water, a compound of nitro emulsion is used. Small veins, wrinkles and imperceptible scratches on the surface prove its naturalness rendering each skin one of a kind. Leather is obtained by the butchering for feeding purposes. It's produced in Tuscany, an Italian region well-known for production of some of the finest quality vegetable tanned leathers, and it's protected and promoted by the trademark "Pelle Conciata al Vegetale in Toscana". No bovine has been therefore killed only for furnishings consumerism.

Il Cuoio Pieno Fiore è un materiale ottenuto da pelli di bovino di prima qualità di provenienza da membri dell'UE. La parte di pellame utilizzata è la spalla. Nella fase di concia, durante la quale vengono usate sostanze vegetali, non è presente il pentaclorofenolo, come richiesto dalle normative UE. La rifinitura del cuoio è effettuata con pigmenti e resine composti principalmente da caseine e, quindi a bassissimo contenuto tossico. In ultima fase, per impedire l'assorbimento dell'acqua dal lato fiore, viene usato un composto di nitro emulsione. Piccole venature, grinze e graffi impercettibili sulla superficie dimostrano la naturalezza della pelle rendendola unica nel suo genere. Il cuoio è ottenuto dalla macellazione avvenuta per scopi alimentari. Nessun bovino è stato dunque abbattuto per il solo consumo di articoli di arredamento. È prodotto in Toscana, una regione italiana famosa per la produzione delle migliori qualità di cuoio conciato al vegetale ed è protetto e promosso dal consorzio "Pelle Conciata al Vegetale in Toscana".
